

Dear Parents and rising 6th Grade students,

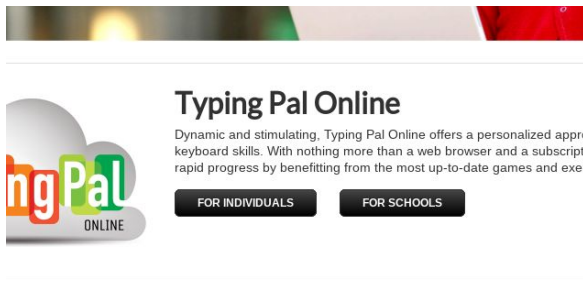

The ability to touch type is an important skill in the middle school. Due to time constraints, we are unable to spend class time mastering the keyboard. Therefore, it is important for the students to learn this on their own. Friends Academy subscribes to an online typing program, Typing Pal, that students can access from any home computer. It is our goal for students to learn the keyboard and become as proficient as possible before the start of school (**20 wpm with 80% accuracy**). Directions to log on to the web site are below. I also have access to their progress. Ideally, covering the keyboard with stickers, or making a keyboard cover out of cardboard, helps students refrain from looking at the keys. Should you experience technical difficulties logging on, please email me at clare_nesfield@fa.org, Ken Ambach at ken_ambach@fa.org, or Rob Grella at rob_grella@fa.org

Touch Typing. Touch typing improves typing speed and accuracy. A touch typist never looks at the keyboard. The fingers hit the right keys by force of habit. The typist is entirely focused on the text being typed, reading the words and phrases as the fingers type the text reflexively.
